

# English Classes at GSC.

## Greetings...

At Gashar Science Center, our English classes for monastic staff have become a cornerstone of our educational offerings, operating across three semesters each year. These classes are meticulously designed to address the diverse needs of the monastic community, providing them with essential language skills while integrating broader educational themes. Each semester, we curate a selection of textbooks that cover a range of topics, from fundamental grammar and vocabulary to more advanced language use, tailored specifically to the context and needs of the monastic staff.

Our curriculum is dynamic and multifaceted, ensuring that students not only engage with the material but also apply it practically. We bring in a variety of guest speakers, including language experts, educators, and cultural ambassadors, to provide valuable insights and real-world applications of the English language. These guest sessions offer the monastic staff opportunities to interact with professionals, ask questions, and gain perspectives that enrich their learning experience beyond the standard classroom setting.

The approach of incorporating different textbooks and inviting guest speakers reflects our commitment to offering a well-rounded and comprehensive English education. By blending traditional learning resources with interactive and contemporary elements, we strive to enhance the language proficiency of the monastic staff while supporting their unique roles and responsibilities within the community. This holistic approach ensures that the English classes at Gashar Science Center are not just about learning a new language but also about expanding horizons and fostering a deeper connection with the global community.
